## Basics of Styles

My Button Component Home

## Basics of Classnames

My Button Stylesheet

# Basics of Styles

Now we have a button and a style, but no way to format it. When wanting to move the elements around the page, we can use a style sheet!

# My Button Component Home

```
export default function Home() {  
  return (  
       
      
  );  
}
```
