- Next JS Export Location

Next JS Export

Inside of next js, we can export a static html file.

MUI Bar CSS

```
/** Inside of next.config.mjs */  
/** @type {import('next').NextConfig} */  
const nextConfig = {  
  output: 'export',  
  images: {  
    unoptimized: true,  
  },  
  assetPrefix: process.env.ASSET_PREFIX,  
  basePath: "/wsu-example-project/public" + process.env.ASSET_PREFIX,  
};  
  
export default nextConfig;
```

Next JS Export Location

Now we should see an export inside of out/
