- MUI Button Types Centered

- MUI Button Types Centered CSS

When we want to have a customizable webpage with preloaded JSX elements, we can use a component library like MUI.

REMEBER TO BRING YOUR RESUME PRINTED ON FRIDAY

"npm install @mui/material @emotion/react @emotion/styled" run that command in your project folder

# MUI Examples

The best way to get started with a component library is using their examples

# MUI Button

```
"use client"  
import Button from '@mui/material/Button';  
...
```

# MUI Button

```
"use client"  
import Button from '@mui/material/Button';  
...
```

# MUI Button

```
"use client"  
import Button from '@mui/material/Button';  
...
```

# MUI Button Types

```
export default function Home(){  
  return (  
    <div className={styles.main}>  
      <Button variant="text">Text</Button>  
      <Button variant="contained">Contained</Button>  
      <Button variant="outlined">Outlined</Button>  
    </div>  
  );  
}
```

# MUI Button Types Centered

```
export default function Home(){  
  return (  
    <div className={styles.main}>  
      <Button variant="text">Text</Button>  
      <Button variant="contained">Contained</Button>  
      <Button variant="outlined">Outlined</Button>  
    </div>  
  );  
}
```

# MUI Button Types Centered CSS

```
.main {  
  display: flex;  
  flex-direction: column;  
  align-items: center;  
  padding: 6rem;  
  min-height: 100vh  
}
```
